- Order Lead Time: Standard build/colour: approx 4 - 6 Weeks
Customized build/colour: 8+ weeks depending on manufacturer work load

General Comments: The Trekker Luxus is a fully adaptable flexible saddle, having individually adjustable panels, seat sizes and fully adjustable pommel width to co-ordinate perfectly with the most diverse horses - One saddle really does fit all!

Developed in co-operation with veterinary surgeons, physiotherapists and experienced endurance riders.

The underside has thick, adjustable panels which are secured by wide Velcro strips. These panels are completely flexible and adapt to the horses shape. With these panels and reinforcements, the Luxus does not touch the horse's spine in any way leaving the spine free of any pressure.

The Luxus gives a very comfortable and safe seat, similar feel to riding in a Stock Saddle. Because of the special style and cut, this saddle is made for riders who want to sit in a long and stretched position. They can be used however just as well for riding with short stirrups leathers.

Maintenance/Care: Use a good quality leather conditioner to keep the leather in top condition.

When mounting or carrying the saddle do not grab the adjustment bar in the middle of the pommel.
