- Options:
- Accessories: Safety Stirrups
- Order Lead Time: Standard build/colour: approx 4 - 6 Weeks  
Customized build/colour: 8+ weeks depending on manufacturer work load
- General Comments: The Trekker Pony Classic is a mini version of the Trekker Pro Endurance Classic. A fully adaptable flexible saddle made especially for the young growing rider.

Configuring the pommel, seat and underside panels to suit the horse and rider, the saddle then flexes under the weight of the rider to follow the contours of the horses back. Shock absorption and weight distribution is excellent.

Adjusting the saddle is easy. The pommel widens and narrows by turning the adjustment bar in the middle of the pommel. The seat adjusts by removing the underside panels to expose the access point for the screws that fix the seat in position. Peel the Velcro seat cushion top off, loosen the screws then slide the seat to the desired position. Tighten the screws, replace the seat cushion and replace the underside panels in the desired position to suit the horse's shape.

Safe and handy for young riders as the saddle can be reconfigured as the rider grows or changes horses, no need to purchase a new saddle, for a while, then the other trekker models can be looked at. The pommel and cantle provide a safe secure seat.

**Maintenance/Care:** Use a good quality leather conditioner to keep the leather in top condition.

When mounting or carrying the saddle do not grab the adjustment bar in the middle of the pommel.
