Accessories:	Safety Stirrups Sheep Skin Seat Saver
Order Lead Time:	Standard build/colour: approx 4 - 6 Weeks Customized build/colour: 8+ weeks depending on manufacturer work load
General Comments:	The Trekker True Talent is a fully adaptable flexible saddle developed in co-operation with veterinary surgeons, physiotherapists and experienced endurance riders.

Short, lightweight and compact the saddle suits big horses as well as Ponies and Arabs.

The saddle is flexible and once the pommel, seat and panels are configured to suit the horse and rider and saddle flexes under the riders weight to follow the contours of the horses back. Weight distribution and shock absorption is excellent.

Adjusting the saddle is easy. The pommel widens and narrows by turning the bar in the middle of the pommel. The seat adjusts by peeling the Velcro seat cushion top off and loosening the screws under the flap in the middle of the underside of the saddle and sliding the seat to the desired position. Tighten the screws and replace the seat cushion.

Maintenance/Care: Use a good quality leather conditioner to keep the leather in top condition.

When mounting or carrying the saddle do not grab the adjustment bar in the middle of the pommel.
